I am a general partner of BeingBeyond, a startup dedicated to advancing foundation models for embodied AI, where I collaborate closely Prof. Zongqing Lu. Before that, I was a research scientist at the Beijing Academy of Artificial Intelligence (BAAI). I received both my PhD and bachelor degrees from Renmin University of China in 2023 and 2018, respectively, under the supervision of Prof. Qin Jin. My research interests focus on human behavior and motion understanding, vision-language pretraining, and embodied artificial intelligence. Currently, I am working on developing general-purpose humanoid robots.

EDUCATION

Renmin University of China Ph.D. in Computer Science	<i>2018.09 - 2023.06</i> Advisor: Qin Jin
Renmin University of China B.S. in Computer Science	<i>2014.09 - 2018.06</i> Advisor: Qin Jin

KEY PROJECTS

Being-M0 The first large-scale motion generation foundation model with 1 million self-collected motion data, self-built data curation pipeline.	<i>2025.05</i>
Being-0 A hierarchical agent framework that integrates an Foundation Model (FM) with a modular skill library. The FM handles high-level cognitive tasks such as instruction understanding, task planning, and reasoning, while the skill library provides stable locomotion and dexterous manipulation for low-level control.	<i>2025.2</i>
Being-VL-0 Our large-scale vision-language model with a novel image tokenizer that bridges this gap by applying the principle of Byte-Pair Encoding (BPE) to visual data.	<i>2024.10</i>
